

Dimension	Enterprise AI orchestration	ETL/iPaaS — Integration Platform as a Service	RPA
Primary function	Coordinates intelligence across systems	Moves data between systems	Automates rule-based screen interactions
Decision logic	Adaptive; selects actions based on context	None; executes defined data mappings	None; follows scripted sequences
Adaptability	Adjusts execution paths based on real-time conditions	Fixed pipelines; changes require reconfiguration	Fixed scripts; changes require reprogramming
Best fit	Multi-model, multi-agent workflows requiring governance	Data movement between applications	High-volume, repetitive UI-based tasks
