

Tool

LangGraph

CrewAI

HumanLayer

Permit.io MCP

Dataiku

Pattern support

Interrupt and resume

Human as a tool

Human as a tool + approvals

Approval flows

Approval flows and human intervention checkpoints

Governance features

Checkpoint persistence, state replay, execution graph visualization

Role-based agent coordination, multi-LLM support: agent-level llm attribute lets each agent use a different model

Slack/email integration, approval routing

ReBAC policies, MCP integration, policy-as-code

Agent Review for collaborative human oversight of agent outputs, Dataiku Govern for approval workflows and audit trails

Best for

Teams building on LangChain with complex stateful workflows

Teams using role-based multi-agent architectures

Teams wanting lightweight human oversight without heavy infrastructure

Teams needing fine-grained, policy-driven approval logic

Enterprise teams needing governance across agent fleets
